Visalia, CA 93291

Re: **Backflow assembly at 618 W Main, Visalia, CA 93291**

Dear Sir or Madam:

The backflow prevention assembly at your property is due for annual testing, pursuant to Title 17 of the California Administrative Code (Section 7605C) and California Public Utilities Commission Rule 16C.

Because backflow prevention assemblies protect the domestic water supply from being contaminated by water from private properties, it is critical that they be tested after they are installed, relocated, and/or repaired, and then annually thereafter, as required by law.

Please have your backflow prevention assembly(s) tested by a certified tester and return the enclosed form **by June 16, 2010**. We have also enclosed a list of certified testers that serve your community and meet the minimum qualifications. Please read the disclosures on the list prior to contracting with a tester.

Backflow prevention is critical to ensuring a safe public water supply, and that is why it is so important that you respond promptly to this request. **If you have not already done so, please verify that your water heating system is protected against thermal expansion. Failure to do so can result in an unsafe condition, leading to injury and/or property damage.** Please contact me at (559) 624-1600 if you have any questions or concerns.

Sincerely,

Mike Morton  
Distribution Superintendent

### Backflow Assembly Tester Resource List

Please be advised that only test results from testers that meet certain minimum requirements will be accepted by California Water Service Company (Cal Water). The list that is provided by Cal Water is not an endorsement of any firm, nor is it a guarantee/warranty of their work. This list is provided to our customers without any obligation on behalf of the customer to use their services. Cal Water has no financial interest in any of the firms listed as testers. In order to be included on this list, a tester must demonstrate certification from California- Nevada Section American Water Works Association, or the American Backflow Prevention Association as a backflow prevention assembly tester, and certification/calibration of their testing equipment. The list is non exclusive, so there may be firms that meet these requirements that are not on the list. CWSC reserves the right to include or remove any tester from this list without notice or cause. The list is provided to the customer merely as a service to identify testers who meet these general requirements.

Cal Water encourages all customers to report any complaints they may have concerning testers. Cal Water is not in a position to resolve disputes, as there is no representation as to the quality of work; however, Cal Water may review such complaints in deciding whether to keep a firm on the list or review their test results. Cal Water is also preparing to begin audits of testers to ensure that our customers are being well served by the testing community.
